DETAILED ACTION

Response to Amendments

Applicant's amendment filed on 12/8/2004 has been considered and entered. Applicant's request for reconsideration of the rejection of the last Office action is persuasive and, therefore, the last office action is withdrawn.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claim 1-19 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 1-19 are allowed over the prior art of record. The prior art of record fails to teach or suggest an apparatus of an analog input module for a controller that implements a technique for providing an output terminal of a input circuit is dependent upon either voltage input or current input to the input circuit without any switching between the voltage input or the current input. A novel advantage of the invention is to eliminate switching mechanism to switch between different input circuit depending on the voltage or current range to be input to a module.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not replied upon is considered to pertinent application's disclosure. The cited references relate to multi range input circuit for analog input modules.
